Details of Environmental Monitoring

AMBIENT AIR QUALITY MONITORING

Ambient Air Quality Monitoring Stations: Ambient air quality monitoring has been carried out at 2 locations namely **1. Near Main Gate2. Near Store.** This will enable to have a comparative analytical understanding about air quality and the changes in the air environment in the factory area with respect to the condition prevailing.

Ambient Air Quality Monitoring Methodology

Monitoring was conducted in respect of the following parameters:

- Particulate Matter 10 (PM_{10})
 - Particulate Matter 2.5 ($PM_{2.5}$)
 - Sulphur Dioxide (SO_2)
 - Oxides of Nitrogen (NO_x)
- Instrument used Repairable Dust Sampler
Model RDS9000/040506,507&040139

The duration of sampling of PM_{10} , $PM_{2.5}$, SO_2 and NO_x was 24 hourly continuous sampling per day. The monitoring was conducted for one day at the location. This is to allow a comparison with the National Ambient Air Quality Standards. The air samples were analyzed as per standard methods specified by Central Pollution Control Board (CPCB) and IS:5182. The techniques used for ambient air quality monitoring and minimum detectable levels. Fine Particulate Sampler instruments have been used for monitoring Particulate Matter 2.5 ($PM_{2.5}$ i.e. <2.5 microns), and Respirable Dust Sampler was used for sampling Respirable fraction (PM_{10} i.e. <10 microns), gaseous pollutants like SO_2 , and NO_x .

SOIL MONITORING

The objective of the soil monitoring is to identify the impacts of ongoing activities within the Plant premises on soil quality and also predict impacts, which have arisen due to execution of various constructions allied activities. Accordingly, a study of assessment of the soil quality has been carried out.

To assess impacts of ongoing plant activities on the soil in the area, the Physico-chemical characteristics of soils were examined by obtaining soil samples from selected points and analysis of the same. Single sample of soil was collected from the middle part of the Plant site for studying soil characteristics.
